RIVER FORECAST

Cal OES INLAND REGION

River Forecast – The following rivers are expected to meet or exceed Flood Stage:

Placer County:

- Truckee River at Truckee As of 04/09/18 at 1320 hours, releases from the Lake Tahoe Dam will increase, leading to minor flooding along the Truckee River from below the dam to the Truckee area. The river is expected to see flows between 4.4 feet and 4.6 feet through 04/14/18. Flood stage is 4.5 feet.
 - Minor flooding will impact the Truckee River bike path and Deep Creek campground. Water may also inundate some yards and basements of homes near the river.

River Forecast – The following rivers are expected to meet or exceed Monitor Stage:

Colusa County:

• Sacramento River at Tisdale Weir crested at 48.0 feet early the morning of 04/09/18. As of 04/10/18 at 0700 hours, it is at 46.1 feet and continues to recede. Flood stage is 53.0 feet.

Sutter & Yolo Counties:

Sacramento River at Fremont Weir crested at 33.2 feet the morning of 04/09/18. As of 04/10/18 at 0700 hours, it is at 32.8 feet and continues to recede. Flood stage is 39.5 feet.

Merced County:

Merced River at Stevinson is expected to crest at 67.7 feet the evening of 04/11/18. Flood stage is 71.0 feet.

WEATHER OF CONCERN

Weather of Concern

• Gusty winds will develop in the Southern California deserts Wednesday through Thursday. The wilds will likely lead to areas of blowing dust/sand, and will produce hazardous cross winds along portions of I-8, I-10, and Hwys 62, 82, 78, 111 and 247.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

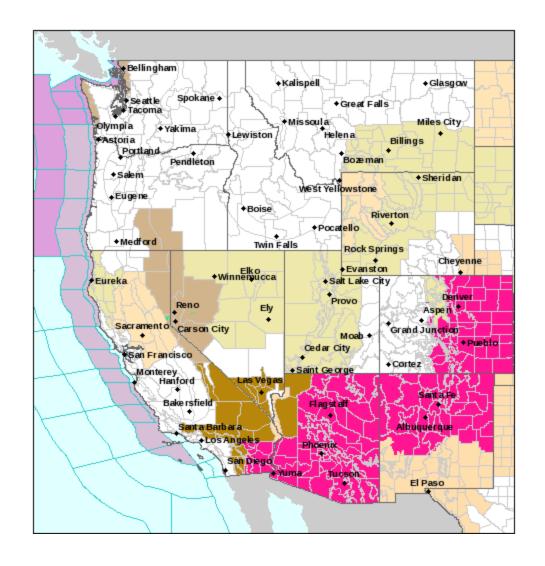

An unsettled weather pattern, due to a persistent strong jet and embedded Pacific waves, will affect the region this week, and bring light to moderate precipitation, cooler than normal temperatures and a gustier wind flow. Confidence is high for this pattern shift, but only moderate in terms of timing the wave passages beyond 5 days. The first wave passage will occur today and this evening although rainfall amounts will be light. The second wave passage will be stronger and contain light to moderate amounts of precipitation Wednesday and Thursday. This wave will be cooler so snow levels will drop to between 3,000 to 4,000 feet Wednesday night into Thursday. Southerly winds will increase today with gusts between 30 to 40 mph favoring the far north and east. Wind speeds will increase on Wednesday ahead of the cold frontal passage. Gusts between 40 to 50 mph once again favoring the far north and east will be possible then. The cold front will swing across the area Wednesday evening and lead to a more westerly flow on Thursday although speeds will trend lower. Humidity levels will climb the next few days and strong winds will not line up with low humidity readings.

SOUTHERN CALIFORNIA

Well above normal temperatures along with minimum humidity in the single digits and teens will continue away from the coast today as a ridge of high pressure remains over California. Maximum temperatures will be 10 to 20 degrees above normal, with upper 60s and 70s across the mountains and 80s to mid 90s in the valleys. Significant cooling and big increase in humidity will occur Wednesday and Thursday as a Pacific trough moves inland over Northern California. Temperatures will be 5 to 10 degrees below normal by Thursday, with most valley highs staying in the 60s. Showers will form over the Sierra Wednesday night with up to an inch of rainfall. The snow level will be around 6,000 feet. Westerly winds of 20 to 40 mph with gusts to 60 mph will surface across the mountain ridges and desert passes Wednesday afternoon through Thursday afternoon. North winds of 20 to 40 mph with gusts to 60 mph will surface across much of Santa Barbara County and the Grapevine Thursday night.

Cal OES LAW ENFORCEMENT MISSIONS

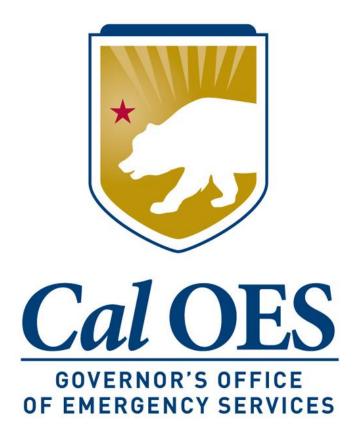

Cal OES Law Missions

• 2018-LAW-46136, 04/10/18, 2219 hours: The International Emergency Rescue Coordination Center (IERCC) advised of an inReach device sounding at the coordinates of 33°48'09.5"N 116°41'54.2"W plotting adjacent to the Pacific Crest Trail in Riverside County. The R/O was advising they were lost and could not find their way back to their campground. LDO contacted Riverside County Sheriff's Office (RCSO) regarding the inReach activation; RCSO accepted the mission. At 2302 hours, IERCC advised LDO the R/O canceled their inReach activation opting to shelter in place in their tent. RCSO was advised of the update and canceled their response. Mission Closed.

Cal OES MISSION TASKING

Cal OES Missions

- 2018-IREOC-45244: Caltrans to remove dead and dying trees along highways in Kern, Tulare, Fresno, Madera, Mariposa, Tuolumne, Calaveras, Butte, Plumas, Sierra, Shasta, and Lassen counties. (On Scene Long-term assignment)
- 2017-SOC-44098: CalRecycle Debris Management Team in Ventura County (Coordinating)
- 2017-SOC-43821: DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene)
- 2017-Inland-42559: Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
